WHOLESALE PRICE LIST ^{of}

FALL 1924 — SPRING 1925

Hardwood Cuttings, Seed, Seedlings and Lining Out Stock.

SOUTHERN GROWN CUTTINGS BEST.

Ask any Florist which roots and propagates the best and grows off most freely—CUTTINGS from out door wood, or from indoor wood, (wood grown under glass). Ninety-nine per cent will answer: "INDOOR WOOD." WHY IS THIS TRUE? The indoor wood is more porous, is not as hard grained, and, therefore, callouses and throws out roots more readily than the hard grained out-door wood.

The out-door wood is likely to make big, hard collouses with no roots, while the indoor wood makes SOFT callouses, which throw out healthy young roots, and the plants start off freely and grow vigorously.

In the same way and for the same reason, SOUTHERN grown CUTTINGS root more FREELY, and start off more vigorously than northern grown cuttings

As any Florist, or try a few southern grown cuttings and be convinced. *We make a specialty of Southern grown cuttings.*

We herewith submit you a list of our *QUALITY CUTTINGS*, and if you have not dealt with us before, give us a small trial order.

ROSEBANK NURSERY CO., Inc.,

Huntsville, Alabama.
